Fire Underwriters' Recommendations

Chief Stanton Says Many Water Mains in Business Section Are Too Small-Room Enough at Central Station for Any Additional Apparatus, Says Councilman Crooks-Water Department Ready to Carry Out Recommendations if Financial Backing is Assured.

Since the last council meeting I low land rather than through any fault low land rather than through any fault of the city.

That \$60 be paid Mrs. Henry Peale for damage resulting from water backing up into her premises at 65 Asylum street.

The reports were all accepted and the recommendations adopted.

The auditor's report was presented, accepted and ordered printed in the Journal. have taken up the matter of providing for the use of the new police patrol ambulance during the day time as well as at night, said Mayor Allyn L. Brown at the adjourned meeting of he common council on Monday even-

ing. I am glad to state that with the approval of the police commissioners have made an arrangement whereby loseph Fields, the assistant janitor of the court house, will operate the ambulance during the day time, when the

bulance during the day time, when the regular officer assigned to that work is not on duty, at a comparatively trifling expense to the city. It was the intention of the commissioners, in recommending the purchase of this ambulance, to have it available for use at all times, and now that the city has this equipment it certainly should be used whenever needed. I trust that the present arrangement will be satisfactory to all concerned.

I wish to take this opportunity of calling to the personal attention of every member of the court of common council, and to the attention of all of the citizens of Norwich also, the essential and pressing need of subscribing, just as soon and for just as much as possible, of the second Liberty loan. In the estimate which I understand was prepared by the treasury department at Washington Connecticut's apportionment of the present loan was

was prepared by the treasury department at Washington Connecticut's apportionment of the present loan was stry-three millions of dollars, which means \$50 for each man, woman and child throughout the whole state, according to the state's present population. This means that if this desired and necessary result is to be obtained every person must subscribe and subscribe just as freely as he possibly can. Everyone who has been elected to public office should set an example in this matter according to his resources. The important thing is to focus the people's attention upon the need. The investment is too good and too secure to call for argument, but the failure of the people to realize the country's need to have this money to use may be of most serious consequence. May each member of this council and every citizen of this city subscribe and urge others to subscribe each fully according to his ability and patriotic duty.

patriotic duty.

One of the principal matters of busi-cess was a discussion of the recom-mendations made by the National Board of Fire Underwriters in con-nection with the local fire department and the water system. By request of the fire commissioners. Fire Chief Howard L. Stanton and Albert S. Comstock, president of the water board, were present to answer questions in regard to the local conditions. Fire Chief Stanton in the course of his remarks said that a number of the water mains in the business section of the city are too small and that although at full pond there is a pressure of 102 pounds in some sections yet it is practically impossible to get two effectual streams for a fire.

The meeting was called to order at 8.25 by Mayor Brown and the reading of the minutes of the previous meetand the water system. By request of

of the minutes of the previous meet-ing took the usual course. The clerk read the return of publication of the Bath street ordinance and the pro-rosed sprinkling and oiling ordinance. There was no one to be heard on these matters and the hearings were and the ordinances declared legal.

The Sidewalk Hearings. The sidewalk hearings were then opened. These hearings were on the sidewalks ordered at the last council meeting. The cierk read a communication from B. P. Bishop and G. Prestos cation from B. P. Bishop and G. Frestos saying that they commend the coun-cil's endeavors to improve the side-walks of the city They suggested that they be allowed to repair their walks row and await a more favorable time to lay new walks. They thought the if the council should order them to lay new walks the owners of the ad-joining properties, whose walks are in just as bad condition as theirs, should be required to law new walks

Asked Time Extension. Miss Amy Cogswell was present to ask for an extension of time as she felt she could not lay her walk within the specified time. Mayor Brown said that although a time limit had been fixed it was understood that when conditions warrant an extension of time would be allowed.

would be allowed.

City Engineer Chandler said he had been requested by Walton S. Daven; port to ask for an extension of time,

Councilman Crooks said he thought that new walks should not be ordered at this time, but that repairs be ordered instead.

Mayor Brown said that where new walks have been ordered repairs are out of the question. The city is in constant danger of lawsuits through defective sidewalks and the walks must be put in shape.

The hearings were then declared closed and the sidewalk resolutions

More Sidewalks Ordered. A petition from the public works committee read by City Clerk J. A. Desmond asks that F. J. Huntington and Mary H. and Charles H. Coit be ordered to construct new granolithic walks in front of their property on Broadway. The petition was accepted and a hearing on the matter set for the evening of Nov. 5 in the council chamber.

chamber.
The public works committee reported that they had granted the Plaut-Cadden company permission to remove their street clock from in front of their old location to a position in front of their new store.

The committee also reported progress on the petition of R. Francescand others asking that certain streets be accepted by the city.

Other Reports Made.

Other reports were made as follows:

Police committee—Petition of J. A. Leede and others for lights on Dunham street; recommendation that petitioners be given leave to withdraw as locations specified are out of the city limits.

Councilman Worth presented a peti Councilman Worth presented a peti-tion from C. B. Bromley & Son ask-ing that they be allowed to erect a gag pump in front of their property on Cedar street. They previously pe-titioned for permission to erect a pump in front of their place of busi-ness on Water street. The new peti-tion asks that the permission granted be for Mechanic street instead of Wa-ter street.

ter street.

The petition was referred to the public works committee.

Councilman Worth also presented a petition from W. S. Alling asking permission to excavate in front of the Alling property on Shetucket street for the installation of a heating system. The petition was referred to the public works committee with power.

The Fire Recommendations. Alderman Guy B. Dolbeare then brought up the matter of the recom-nendations of the National Board of mendations of the National Board of Fire Underwriters. The recommenda-tions he said effect both the fire and water departments. The fire depart-ment, he said, is sometimes hampered in its work through lack of coopera-tion on the part of other departments of the city. Alderman Dolbeare said that it had been remarked to him that it was queer Norwich had a higher in-surance rate than New Haven. This, he said, was due to the fact that New Haven has larger water mains and Haven has larger water mains and more hydrants. Norwich has a total of 56 fire alarm boxes, 18 of which are private. In forty-one years Norwich has increased its fire alarm boxes from 10 to 48 less than one box a

ear. Alderman Dolbeare favored an ordi nance calling for the use of non-com-bustible or slow burning materials in future roof repairs.

Councilman Crooks made a motion that the recommendations be read by the clerk. The recommendations were read and taken up for general discus-

regard to the recommendation that twelve inch mains be laid in certain sections of the city Alderman Dolbeare said he understood that the laying of four-inch mains has prac-tically been discontinued.

No More Four-inch Mains. Albert S. Comstock, president of the water board, said that some time ago it had been decided to lay no more four-inch mains. He said that there was no law governing the matter but that experience has shown that it is better to lay larger mains. Mr. Comstock said that the water department is ready to carry out every one of the recommendations made by the fire underwriters if the finance committee derwriters if the finance committee will give its consent. He spoke of a number of improvements which hove been in mind from the to time and which it had been impossible to carry out because of the lack of funds. The city expects so much revenue from the water department each year and the money cannot be used for im-provements and turned over to the

city too.

Mayor Brown asked Chief Stanton if he would like to say anything. Water Mains Too Small. answer any questions that might be asked. It is a matter of fact, said the chief, that many mains in the business section of the city are too small. The recommendations made by the fire underwriters, he said, have been made in his annual reports and the annual reports of the board of

years. - Small Water Flow. Chief Stanton said that although there is a pressure of 102 pounds on Water street when the reservoirs are at full pond the small mains do not provide a flow large enough for two effectual streams.

effectual streams.

Councilman Craney asked if it would not be possible to pump from the river in case of a bad fire.

Chief Stanton said that that was practically impossible as there is but one place where the engines could be placed in order to draw from the river City Engineer Chandler said he had been requested by Walton S. Daven; port to ask for an extension of time, as Mr. Davenport intends to build on his property next spring and would build his retaining wall and sidewalk at that time.

Poor Walk in Greeneville.

Councilman Crooks called attention to the very poor condition of a walk on North Main street below St. Mary's church and on the opposite side of the street.

Mayor Brown said that negotiations are now under way to have the walk put in shape.

Councilman Crooks said he thought that new walks should not be ordered public works committee be asked to look into the matter and ascertain if the rental conditions were being com-plied with.

Unwise to Move Station.

In regard to the recommendation that the West Side Chemical company be moved to a location near Asylum and West Main streets Alderman M. C. Higgins said he felt that it would be very unwise to deprive that thickly settled part of the city of its present fire protection by making any such change.

Alderman Dolbeare said that if the West Side company remains at its present location it will be necessary to rebuild the station in the near future as it is in poor condition.

Reom for Additional Apparatus.

Room for Additional Apparatus.

Councilman Crooks said that there is ample room at the central station for any additional apparatus and that if it was decided to close up the Main street station the auto chemical now located there could be housed at the Central station. He said that if Box 7 (Mr. Pleasant street schoolhouse) should be pulled in the city companies would be on the spot ahead of the West Side company, this being possible because of the auto apparatus. In Greeneville, when an alarm is pulled in for a fire in that important section of the city the Greeneville companies are often unable to respond hecause they do not have the horses on hand and the city companies are on the scene long before the Greeneville companies. Some of the fire alarm boxes are as far as two thousand feet apart, he said. Councilman Crooks said that there is

Small Per Capita Loss. Small Per Capita Loss.

Chief Stanton called attention to Finance committée Triat 175 damages be paid Edward McCaffrey for damages by water backing up into his premises at 94 Spring street.

Petition of Lydia F. Sweetzer, 768 Main street, for damages as result of water backing up into her premises: recommendation that claim be dissipated by with us, he added.

The discussion was then brought to The count with insurance companies because we have the fire hazard with us, he added.

The discussion was then brought to The Water backing up into his city last year was but 24 cents, the smallest in the state, while New Smokeless.

Most Old People Are Constipated

The wear of years impairs the action of the bowels. As people grow older they restrict their activity, neglect to take sufficient exercise, and indulge a natural disposition to take things easy. The digestive organs become more sensitive to the demands made upon them and rebel more quickly.

quickly.

It is of special importance to the health of elderly people that the bowels be kept normally active. A mild, yet effective, remedy for constipation, and one that is especially suited to the needs of old folks, women and children, is the combination of simple laxative herbs with pepsin sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin. It costs only fifty cents a bottle, and should be in every family medicine chest. in every family medicine chest.
